= Tropical wet forest

Largest rainforests

- 1 Amazon (S. America)
- 2 Congo
- 3 Valdivian (Chile/Argentina)
- 4 Daintree (Australia)
- 5 South East Asian

Rainforest facts

Rainforests once covered 14% of the world, now covers 6%.

Around 150,000 square kilometres of rainforest are chopped down each year.

One hectare of rainforest can contain over 200 different tree species.

Rainforests are old. Up to 70 million years old.
